

Supplementary Fig. S2. Culture growth graphs for *Geminocystis urbisnovae* sp. nov. Strain CALU 1334 (A), strain CALU 1759 (B), strain CALU 1794 (C), strain CALU 1801 (D), and strain CALU 1807 (E). Experiments with different NaCl additions to basal medium; culture density tested in ≥ 3 independent assays, with two biological duplicates and two technical duplicates each.
